

Marcus Silva

Freelance Web & E-Commerce Developer

Lisbon, Portugal | m.silva.build@example.com | +351 900 000 000

portfolio: msilva-builds.example.com | available 30 hrs/week, remote

PROFILE

Freelance developer with six years building and maintaining online stores and business websites for small companies across Europe. Most of my work is WordPress and Shopify — custom themes, checkout fixes, payment gateways, speed work — plus the back-office scripts that stop clients copying data between spreadsheets by hand. I take projects end to end, from the first call to handover, and I write documentation the client can actually follow. Portuguese and English; conversational Spanish.

TECHNICAL SKILLS

Web development: PHP, JavaScript, TypeScript, HTML5, CSS3, Sass, React, jQuery, REST APIs

E-commerce: Shopify (Liquid, theme development), WooCommerce, Stripe, PayPal, payment gateway integration, Amazon & marketplace listings

CMS: WordPress (custom themes and plugins), Elementor, Odoo website module

Data & automation: Python, web scraping (BeautifulSoup, Selenium), PDF data extraction, Excel/CSV automation, Google Sheets API, Power BI, SQL

Infrastructure: MySQL, PostgreSQL, cPanel, Docker, Git, GitHub, Linux/VPS, Cloudflare

Other: SEO fundamentals, Google Analytics, page-speed optimisation, Figma handoff

SELECTED PROJECTS

Multi-Currency Shopify Storefront — homeware retailer, Netherlands

Shopify, Liquid, JavaScript, Stripe

- Built a custom theme from a Figma design, with multi-currency pricing and region-based tax rules.
- Cut checkout abandonment by reworking a three-step checkout into one page.
- Integrated the store with the client's existing stock spreadsheet via a scheduled sync script.

Supplier Price Scraper & Reconciliation Tool — wholesale distributor

Python, BeautifulSoup, Selenium, PostgreSQL

- Scraped daily pricing from eleven supplier sites, normalised inconsistent formats, and flagged changes above a threshold.
- Replaced roughly two days of manual comparison work per week.
- Handled sites that changed their markup without warning by validating structure before parsing.

Invoice PDF to Accounting Export — accountancy practice

Python, pdfplumber, Excel automation

- Command-line tool that reads supplier invoices in inconsistent PDF layouts and outputs a clean spreadsheet ready for import.
- Reached about 95% extraction accuracy across roughly forty vendor formats, with anything uncertain flagged for review rather than guessed.

Sales Performance Dashboard — regional franchise group

Power BI, SQL, REST API

- Consolidated sales data from eight branches into one dashboard with weekly automated refresh.
- Replaced a monthly slide deck that took a member of staff three days to assemble.

Booking & Deposits Site — restaurant group, Porto

WordPress, PHP, Stripe, custom plugin

- Custom booking plugin taking deposits at reservation time, cutting no-shows substantially.
- Built the admin side so non-technical staff could manage tables and time slots without support.

EXPERIENCE

Independent Freelance Developer — 2020 – present

Remote, clients across Portugal, Spain, Netherlands and the UK

- Roughly 60 completed projects, mostly fixed-price between EUR 400 and EUR 6,000.

- Long-running maintenance retainers with four clients covering updates, backups and small features.
- Work arrives through repeat clients and referrals; comfortable scoping and quoting directly.

Junior Web Developer, Trilha Digital — 2018 – 2020

Lisbon — small web agency, six staff

- Built and maintained WordPress and WooCommerce sites for local business clients.
- Took over front-line client support, which is where I learned to write handover docs properly.

EDUCATION & CERTIFICATIONS

Professional Diploma, Web Development — Instituto Superior de Tecnologia, Lisbon | 2018

- Shopify Partner — Theme Development certification
- Microsoft Power BI Data Analyst Associate
- Meta Front-End Developer Professional Certificate

LANGUAGES

Portuguese — native | English — fluent | Spanish — conversational
