Lisbon Portugal | Age 28 | Single | Portuguese nationality

Objective

I am a hard working and detail-oriented web developer who is a great team player and always willing to learn new things. I am seeking a challenging position in a dynamic company where I can grow my career, expand my skill set and think outside the box while contributing to the success of the organisation and taking on more responsibility over time.

Where I've Worked

Freelance Web Developer 2020-present

I have been working as a freelancer for several years now doing many different projects for various clients across Europe. I was responsible for building websites and online stores for clients and I helped with maintaining them as well. I worked on a lot of WordPress sites and also did some Shopify stores, and I am involved in fixing bugs, doing updates, and talking to the clients about what they need. I also wrote some scripts to automate things for clients which saved them time. Duties included handling backups, doing small features when asked, and assisting with whatever the client needs. I have worked with many happy clients who come back to me and refer me to other people which I am proud of.

Junior Web Developer, Trilha Digital Jan 2018 – 2020

- Responsible for building WordPress websites for clients
- Helped with WooCommerce stores and fixing issues that came up
- Was tasked with answering client emails and support requests
- * Assisted senior developers with various tasks as needed
- Participated in team meetings and contributed ideas

Stuff I Know

PHP, JavaScript, HTML, CSS, WordPress, Shopify, WooCommerce, Python, MySQL, some React, Git, Photoshop, Microsoft Office, Excel, communication skills, problem solving, teamwork, time management, leadership, creativity, Windows and Mac, SEO, marketing, and more.

Things I Built

- An online shop for a client that sells homeware. It went well and the client was happy with the result.
- A tool that gets prices from supplier websites automatically so the client doesn't have to check them manually anymore.
- A program that reads invoices and puts them into a spreadsheet, it works pretty well most of the time.
- A dashboard for a company to see their sales, they used to do it by hand before.
- A booking system for restaurants where people can reserve a table online.

Education

Instituto Superior de Tecnologia, Lisbon — Web Development Diploma, 2018

Also I have done several online courses about programming and design.

Hobbies and Interests

Football, video games, watching movies, travelling, reading tech blogs, cooking.
